Venue?	Please check the information in the course calendar.
Mobile Phones?	**Absolutely and strictly forbidden in the class!**

1. ANI Aviation Expert Courses

The ANI Aviation Expert Courses are courses that add to the standard skill set of an aviation professional.

2. Course Description and Terminal Objectives

Flight Procedure Design is a complex field with an interaction of several stakeholders. Designing and implementing a Procedure requires lots of skills and knowledge as well as many coordination interfaces. Managing such a field of activity is demanding and knowing all implications in the process, coordination interfaces will lead to a more efficient service provision. Last but not least it is good for a Manager to know to some extent what the expert staff is dealing with and that designing a procedure is a bit more demanding than drawing a line on a map. Potentials for internal standardization and enhancing efficiency are discussed in the group.

3. Course Rundown

The IFP and Validation Processes
Stakeholder involvement
Coordination interfaces
Who does what, design, independent review, Flight Validation
Reporting and Documentation
Design criteria introduction
Timeframes, political interventions, communication with Regulators

4. Target Audience

Procedure Design Office Managers.
This is BY NO MEANS a course where the participant will learn how to actually design a procedure!

5. Pre-requisites

Attitude to want to increase efficiency in the department/team. Attitude to want to understand what the expert staff in the department/team actually faces day-to-day.
